

# Lesson 16

The 1st finger →

The rest of the fingers →

## A Formation Bar Chord

The A-Formation bar chord is the basic A chord transposed up the fret with the first finger functioning as a capo, allowing you to move this chord up and down the fretboard. Like the A minor formation bar chord, the root of this chord will always be on the 5th string. So, whatever note your first finger touches on the 5th string, that is the name of the chord. For example, if your first finger is on the 1st fret, you will have formed a B $\flat$  chord. (see left)
