

16th Notes

As you know already, a beat can be divided into smaller units. We've already divided the beat into two eighth notes. We can also divide the beat into three, four or more units. No matter how the beat is divided, the notes are always grouped together with beams so that you know they belong to one beat.

Quarter Note 2 Eighth Notes 3 Eighth Notes 4 Sixteenth Notes

Notice that 16th notes have 2 beams.
